AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

Claims 1-17 (Cancelled).

18. (Original) An image processing device for displaying on a screen an image of a first object moving within a virtual space seen from a virtual viewpoint of a second object operated by a player, comprising:

storage means for storing in advance motion patterns of said first object;

means for calculating the distance between said first object and second object and computing a synthetic vector by adding to the speed vector of said first object the vector calculated by multiplying the coefficient corresponding to said distance to the inverse vector of the speed vector of said second object; and

image generating means for reading transition patterns from said storage means and generating images of the speed vector of said first object as said synthetic vector.

19. (Original) An image generating device according claim 18, wherein said coefficient is a coefficient having an inverse proportion to said distance.

20. (Original) An image generating device according to claim 19, wherein said first object is a "bullet."

Claims 21-34 (Cancelled).
